PROFESSIONAL OVERVIEW

I'm a Full-Stack Developer with professional IT operations experience with experience designing and building modern, responsive, and production-ready web applications. Skilled in developing scalable frontend and backend solutions using Next.js, React, TypeScript, PostgreSQL, Supabase, Node.js, and Express.js. I am Passionate about creating software that solves real-world problems while maintaining high engineering standards and clean code practices.

WORK EXPERIENCE

Fullstack Software Developer

Freelance, Nairobi | 2022- Present

- Designed, developed, and deployed production-ready web applications for clients across the tourism, healthcare, manufacturing, and business sectors using **Next.js, React, TypeScript, PHP, and Node.js**.
- Developed scalable backend services and REST APIs using **Node.js, Express.js, and PostgreSQL/Supabase**, supporting secure data management and application workflows.
- Integrated multilingual website support for global audiences.
- Optimized applications for desktop, tablet, and mobile devices.
- Collaborated with stakeholders to transform requirements into production-ready solutions.
- Debugging, maintaining, and continuously improving on existing applications.

Web Developer & IT Support

Tuffsteel Limited | Jan 2023 - Jan 2024

- Developed and maintained the **Imaara Mall** corporate website, implementing new features, content updates, and ensuring high availability for customers and stakeholders.
- Improved website performance by optimizing page load speeds, enhancing responsiveness, and implementing SEO best practices to increase search engine visibility.
- Designed and developed an on-premise file transfer system that streamlined secure data exchange between mall management and tenant businesses, improving operational efficiency.
- Analysed customer engagement data by creating interactive reports, tables, and charts to support business insights and decision-making.
- Collaborated with stakeholders to gather requirements, troubleshoot website issues, and deliver technical solutions aligned with business needs.
- Managed website hosting, domain configuration, and routine maintenance to ensure reliable system performance.
